

R&D Activities

- [Customer relations](#)
- [Research grants](#)

Customer relations

MRC has a strong focus on customer support and R&D with respect to

- customization of standard products
- support of specific applications
- continuous improvement of our products
- investigating new opportunities in our fields of activity (medical technology, lasers & optics, MRI, stereotaxy etc.)

We are always interested in getting your feedback or recommendations regarding our products, services, and new developments.

Research grants

We are and have been involved in various collaborative research projects in order to broaden our product ranges and to open our activities to new fields. The following list shows the titles of current research grants. Due to confidentiality agreements with our collaborators we can not show details of these projects. Where possible, you can find links which include additional information.

- Neurotax (German press release): Use of optical information in stereotaxy
- Photokat: Photoactivation of anti-bacterial coatings
- ITD: Hand-held robot for medical interventions
- Ultrapur: UV illumination of self-cleaning surfaces
- Multilas: Minimal-invasive laser neurosurgery
